Up to the year ended 31st March 2017, the Company prepared its financial statements in accordance with the requirements of previous Generally Accepted Accounting Principles in India (“Indian GAAP”), which includes standards notified under the Companies (Accounting Standards) Rules, 2014.

These are the Company’s first Ind AS financial statements. The date of transition to Ind AS is April 1st, 2016 (transition date).

Significant Accounting Policies

This note provides a list of the significant accounting policies adopted in the preparation of these financial statements. These accounting policies have been consistently applied to all the years presented by the Company unless otherwise stated.

A. Basis of preparation

i. Statement of compliance

These financial statements are prepared in accordance with Indian Accounting Standards (hereinafter referred to as “Ind AS”) under the provisions of the Companies Act, 2013 (hereinafter referred to as ‘the Act’) (to the extent notified). These financial statements for the year ended March 31st, 2018 are the first financial statements of the Company prepared in accordance with Ind AS. For all periods up to and including the year ended March 31st, 2017, the Company prepared its financial statements in accordance with the Generally Accepted Accounting Principles (hereinafter referred to as ‘previous GAAP’) used for its statutory reporting requirement in India. The Company has adopted the Ind AS standards in accordance with Ind AS 101 First time adoption of Indian Accounting Standards. The accounting policies have been consistently applied by the Company unless otherwise stated or where a newly issued accounting standard is initially adopted.

ii. Basis of measurement

The financial statements have been prepared on historical cost/accrual basis.

B. Summary of significant accounting policies

i. Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/non-current classification.

An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle.
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting date, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Based on the nature of products and services offered by the Company, operating cycle determined is 12 months for the purpose of current and non-current classification of assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

iii. Interest Income

Interest income from financial assets is recognized when it is probable that economic benefits will flow to the company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial assets to that asset's net carrying amount on initial recognition.

iv. Earnings per Share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account

- The after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- Weighted average number of equity shares that would have been outstanding assuming the conversion of all the dilutive potential equity.

v. Cash and Cash Equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), and highly liquid time deposits that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

vi. Employee Benefits

- Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employee's services up to the end of the reporting period and are measured at the undiscounted amounts of the benefits expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.
